

# INTEGRAL BIRDY BELT

We recommend using it if the patient's body has no holding on the armchair.

# Y & PELVIC SLIM BELT

It is designed to prevent forward sliding of the patient and to maintain the bust in an upright position.

It can be installed while the patient is sitting to avoid any pelvic constriction.

It is designed to prevent forward sliding of the patient and to maintain the bust in an upright position.

Its shoulder's straps can be separately adjusted in order to position the patient and to compensate from a bad position.
