

# Y SLIM BELT

It is designed to prevent cervical kyphosis by maintaining the bust in an upright position.

It is a bust support combined with a comfort belt whose shoulder's straps can be separately adjusted in order to position the patient and to compensate from a bad position.

We recommend using it if the patient's bust goes forward.

Maximum useful area: 230 cm

# BUST SUPPORT BELT

It is designed to obtain a reinforced bust comfort and to prevent cervical kyphosis by maintaining the bust in upright position.

It provides balanced retraction from the shoulders down to the lower ribs.

We recommend using it if the patient's bust goes forward.
