PADDED WRIST & SECURITY WRIST FASTENERS ANKLE FASTENERS

Wrist Fasteners are installed around the wrists in order to prevent bruises and injuries due to removal attempts.

A security version of the wrist fasteners is available for a stronger contention for agitated patients.

Ankle Fasteners maintain the patient's ankles while allowing freedom of movement.

HEEL PADS

The Heel Pads allow to relieve pressure points and to wrap the foot in a fur trim thus preventing rubbings on the heels and malleoli.

They are available in 2 different models: small and large.
